Work Experience

Game On

Montréal, Qc

Senior Technical Animator / Developer

March 2022 - Present

Senior Technical Animator

October 2020 - March 2022

Technical Animator

February 2018 - October 2020

- Developed and implemented efficient pipelines for animation integration and production using MotionBuilder, Maya, Unreal Engine.
 - Engineered a custom Python motion capture tool that paired a synchronized multi-application recording trigger with centralized data from these applications.
 - Upgraded and maintained a client-facing data requests website.
 - Streamlined workflows by automating tasks in Flow PTR (ShotGrid), Excel, media processing and assets delivery.
 - Designed and deployed custom user interfaces for the post-production pipeline.
 - Administered internal intranet websites for documentation and desk allocation.
 - Integrated and prepared scenes for the animation team.
 - Retargeted motion capture animation to diverse character rigs.
-

Education

Baccalaureate with major in 3D creation

2016

Université du Québec en Abitibi-Témiscamingue, Montréal

Multimedia integration techniques

2014

Cégep de l'Outaouais, Gatineau
